CONTACTLESS PAYMENTS API

Safe checkout is when you send a text message to a customer with a link to enter the PAC and add a tip (if enabled) to authorize a purchase. Safe checkout eliminates the need for the customer to enter the PAC on a number pad in a store.

Safe Checkout (SANDBOX)

POST

URL: [https://tst-](https://tst-api.hypur.com/Payment/SafePurchase?ApiToken={{ApiToken}}&MerchantToken={{MerchantToken}})

[api.hypur.com/Payment/SafePurchase?ApiToken={{ApiToken}}&MerchantToken={{MerchantToken}}](https://tst-api.hypur.com/Payment/SafePurchase?ApiToken={{ApiToken}}&MerchantToken={{MerchantToken}})

Purpose: Allows for safe checkout. This method sends an SMS to the consumer so that they can enter their PAC on their device to complete the purchase.

Sample JSON Request Body: { "Amount": 1.00, "OrderId": 123 }

Safe Checkout (Prod)

POST

URL: <https://api.hypur.com/Payment/SafePurchase?ApiToken={{ApiToken}}&MerchantToken={{MerchantToken}}>

Purpose: Allows for safe checkout. This method sends an SMS to the consumer so that they can enter their PAC on their device to complete the purchase.

Sample JSON Request Body: { "Amount": 1.00, "OrderId": 123 }
