Camp-Adilas - Adilas Pros in the camping industry

- Web based access from anywhere, anytime as long as you have WiFi (and even if WiFi goes down, enable mobile hotspot to get back up and running.
- Security! 24/7 backup and review
 - Export your own backup
- Multi-Corporation ability LLC vs DBA keep track of all your expenses for multiple campgrounds all in one place
- E-Commerce built-in run the e-commerce portion directly through your website with API functionality
- Permission Driven make the system as easy or difficult as it needs to be per user
 - This industry is mainly driven by older generation who needs user friendly, step by step processes. Each company can limit the users permissions based on specific needs and experience.
- Driver License Scan Function easily scan the DL of a customer to auto fill necessary customer data
- CRM System maintain client relations
 - Document communication, add a follow-up date and have it import into Elements of Time
 - Email clients -> create custom email templates
 - Make log notes in the customer (this will be great for returning customers who like specific site numbers or have specific needs)
 - Additionally, you can run "Advanced Search" to search by fields in customer records (IE: search log notes, phone numbers, emails, etc.)
- Discount Rate Feature great for Good Sam parks, Military pricing, and more
- Custom Pricing Engines great for loyalty programs and group pricing
- Live inventory tracking
- Custom Reporting build your custom reports then save them as a template
- Accounts Receivable/Payable Features
 - Payroll functionality
 - Print checks
 - Balance sheets
 - And much more!

- Print and email receipts save money on paper costs by emailing most of your receipts
- Multiple users can access a single data point at the same time no more "records locked by other user" headaches
- POS System -
 - Price helper when adding line items
 - Print and scan barcodes
 - When creating expenses, you can have 2 vendors (IE: "sub-vendor" when paying off credit cards but listing "Costco" as source/sub-vendor)
 - And much more!
