

3/4/15

- (1.75) 6:00-7:45 Paying bills. Emails & recording notes from yesterday.
- (.75) 8:00-8:45 On the phone with Calvin Chipman. He is a software developer & independent computer consultant. He has worked for WordPerfect, Avery Labels, and other companies. We had a good chat and talk. He ~~might~~<sup>may</sup> want to do some projects for us.
- (8.25) 9:30-5:45 Went into Bridgerland to work with the interns. Bryan & I spent almost the entire day working on the solar system - level 4 databases. Great session & lots of progress today. Garrett & Jonathan Dayton were working on adilas API sockets. We took a brake for an hour today to teach the guys some accounting basics. We used up an entire whiteboard & I had a blast showing how different things interact through ~~cause~~ cause & effect relationships. We talked about old school debits & credits (1494 A.D.), T-accounts, chart of accounts, P&L, balance sheet, adjustments, journal entries, ledgers, etc. We also talked about new school accounting & 3D world Building. We talked about time, space, resources, money, flow, data assembly line, the story behind the numbers, checkpoints, flex, & roll call principles. Super fun ... ☺ Here is a small rendition of what the white board looked like ...

See notes from 10/14/14 for more info on the progression and how we got to 3D Accounting and 3D World Building

3/4/15 (Continued)

- I had a lot of fun today talking about the progression of accounting... we went from debits & credits to cause & effect relationships as they flow & pass through space & time. Sort of an overview of old school accounting vs. new school accounting. See small drawing on other page. Fun little session. At the end of the teaching session... Garrett wanted to see that - the progression & data assembly line for data - in real life - inside of adits. We did some sales, deposits, & ran P&L & balance sheets to show what was going on. Good stuff!
- I enjoy learning how things work. It has been super fun to learn things along the way.

3/5/15

- (2.25) 5:45-8:00 Emails & three new logos for different companies.
- (.25) 8:45-9:00 On the phone with Steve catching up on new changes.
- (.25) 9:30-9:45 Small logo changes for a company out of Arizona.
- (2) 9:45-11:45 Went in to Bridgerland to work with my guys. I helped Bryon get started on copying look-up tables in the solar system. He is doing great. Met with Adam and went over round 2 for eComerce. We determined that round 2 will include black boxes, JSON object settings, internal API socket calls, templates, new CSS options, etc. We also determined to add 3 more black boxes. The new ones are ... navigation, side bar left, & side bar right. 30 miles
- (6.25) 11:45-6:00 Worked with Derrick on his mini project for gift cards. We were working on the add process & flow for pages. Garrett & I had a conference call with →
